

Finish-project “Fresh.Point FI”

Our partner: Gemüsering

Marcel Verstappen

About ChainPoint

- Founded in 2003, specialists in Sustainable Sourcing solutions
- Standard software, customized service
- Offices in NL, DE, FR
- Multi disciplinary international team, 25+ team members
- Partner in more than 100 supply chains of well-known brands, companies, NGO's, governments

Why we do what we do...

We believe that quality and sustainability are products of collaboration.

Therefore Connecting Supply Chains is at the heart of everything we do.

Our Fresh.Point FI partner Gemüsering

- Gemüsering is a group of fruit and vegetable producers and traders in southern Germany.
- Gemüsering one of the many users of Fresh.Point

Project objective

- Quality
- Collaboration
- Risk

Project roles

The roles within the project will be:

- ChainPoint: All technical developments on Fresh.Point and implementations based on FIWARE technology; Business concept and marketing
- Gemüsering: support in requirement definition, tests and validation of FI Fresh.Point, support in delivery of test data until go live of new functionality, first user of Fresh.Point FIWARE.

Use of FI-Ware

- We plan to use the cloud infrastructure for storing anonymised aggregations of fruit / veg lab results.
- We envisage that a smartphone and/or tablet app will connect to this cloud for access to the aggregated lab results and will present them visually.
- Since lab results have a geographical element to them (the source of produce) we envisage leveraging the GIS data provider to support visualisation of the location / terrain of the source of produce. We expect to overlay lab result data upon these visualisations.
